Superchips Flashpaq with Tire Size Option Calibration Now Available for 2003-06 Ford Powerstroke

Sanford, FL
October, 2005

Superchips announces the release of their Flashpaq part #1805, for the 2003-2006 Ford Powerstroke diesel engine. A significant difference with this tuner is the user can now calibrate the speedometer for tire size changes. This new tuner also features Superchips TriTune, offering three different levels of performance:

- Performance (towing up to 6000 Lbs.) Additional 94HP and 147 ft.lbs. Torque
- Economy (towing up to 8000 Lbs.) Additional 89 HP and 129 ft.lbs. Torque
- Tow-Safe (factory tow limit) Additional 46 HP and 86 ft.lbs. Torque
- Transmission, Rev and Speed Limiters All Optimized

More options at <http://www.flashpaq.com/>

Superchips Flashpaq units are hand held programmers designed to enhance today's computer controlled engines. By reading and reprogramming the codes in the engine control unit, Superchips releases the power left in the motor by the manufacturer. Tuned every 200 rpm from idle to wide open throttle, Flashpaqs are an economical way to increase a vehicles' performance. Flashpaqs also read the Diagnostic Trouble Codes so the user can trouble shoot the vehicle. Plus, Superchips customers report increases in gas mileage of up to 3 mpg for gas vehicles and up to 5 mpg for diesel vehicles.

Superchips' performance tuning comes from years of experience in tuning computer-controlled cars, trucks and SUVs, and is now an MSD company, Superchips Flashpaq and Max MicroTuners offer significantly improved power, plus many users report fuel mileage improvements. Superchips offers products for most cars, trucks and SUVs.
